

# Convention for the Protection & Development of the Marine Environment of the Wider Caribbean Region – Cartagena Convention

## Framework for Monitoring the State of Environment for the Caribbean Sea

**World Ocean Assessment:  
Workshop for the Wider Caribbean  
Miami, USA  
*13-15 November 2012***

**Christopher Corbin  
Programme Officer  
Secretariat for the Cartagena Convention**

The Caribbean Environment Programme is one of  
18 Regional Seas Programmes  
comprising over 140 Countries

## Regional Seas

West to East: North-East Pacific South-East Pacific Wider Caribbean Upper South-West Atlantic West & Central Africa  
Mediterranean Black Sea Eastern Africa Red Sea & Gulf of Aden ROPME Sea Area South Asian Seas East Asian Seas  
North-West Pacific South Pacific Partner programmes: Arctic North-East Atlantic Baltic Caspian Antarctic

# CARIBBEAN ENVIRONMENT PROGRAMME

## MISSION

**“To promote regional co-operation for the protection & development of the Wider Caribbean Region”**

## OBJECTIVE

**“To achieve sustainable development of marine & coastal resources in the Wider Caribbean Region through effective, integrated management that allows for economic growth & sustainable livelihoods”**

# **The legal & administrative basis for the Caribbean Environment Programme is the:**

**Cartagena Convention for the  
Protection & Development of the  
Wider Caribbean Region**

# CARTAGENA CONVENTION

Only Legally Binding Regional MEA  
for the Protection & Development of  
the Marine Environment of the Wider  
Caribbean Region

**Ships**

**Dumping**

**Land Based**

**Biodiversity**

**Sea/River-Bed**

**Air**

# CARTAGENA CONVENTION & PROTOCOLS

## Cartagena Convention

*Adopted in 1983*

*Entered into force 1986*

### Oil Spills Protocol

*Adopted in 1983*

*Entered into force in 1986*

### Specially Protected Areas and Wildlife Protocol (SPAW)

*Adopted in 1990*

*Entered into force 2000*

### Protocol concerning Land-Based Sources of Pollution (LBS)

*Adopted in 1999*

*Entered into force in 2010*

# What are the Objectives of the Oil Spills Protocol?

Protect marine & coastal environment from oil spill incidents

Establish & maintain means to respond to oil spill incidents & to reduce the risks associated with such incidents

# What are the Objectives of the SPAW Protocol?

Protect, preserve & sustainably manage  
fragile areas & threatened or endangered  
species of flora & fauna

Regulate &/or prohibit activities having  
adverse effects on protected areas & wildlife  
(biodiversity)

# What are the Objectives of the LBS Protocol?

Reduce pollution through establishment of effluent & emission limitations and/or best management practices

Exchange information on land-based pollution through cooperation in monitoring & research

# **Status of Ratification of the Cartagena Convention & its Protocols**

**Cartagena Convention &  
Oil Spills Protocol: 25 countries**

**SPAW Protocol: 15 countries**

**LBS Protocol: 10 countries**

# What are the obligations for exchange of information?

## Article 22: TRANSMISSION OF INFORMATION

The Contracting Parties shall transmit to the Organization information on the measures adopted by them in the implementation of this Convention and of protocols to which they are parties, in such form and at such intervals as the meetings of Contracting Parties may determine

# Article 13

## Scientific & Technical Cooperation

Cooperate in scientific research, monitoring & the exchange of data & other scientific information relating to the Convention

# Article 16

## Meetings of the Parties

Assess periodically the state of the environment in the Convention Area

### Article VI & XII of LBS Protocol

- (vi) *Identify & assess patterns & trends in the environmental quality of the Convention Area;*
- (xii) Report on the State of the Convention Area;*

# What direct support can be provided?

Government Experts: Scientific & Technical Advisory Committees (STACs) for Biodiversity & Pollution; Working Groups of Experts

Regional Activity Centres (RACs) for the Protocols

Regional Activity Network (RAN): Collaborating Agencies & Partners

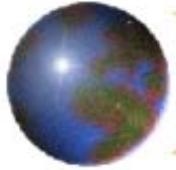

Intergovernmental fora for Decision-Making

Data & Information: CEP Technical Reports, Clearing House Mechanism; Methodologies & Manuals; Data bases; Toolkits; Guidelines;

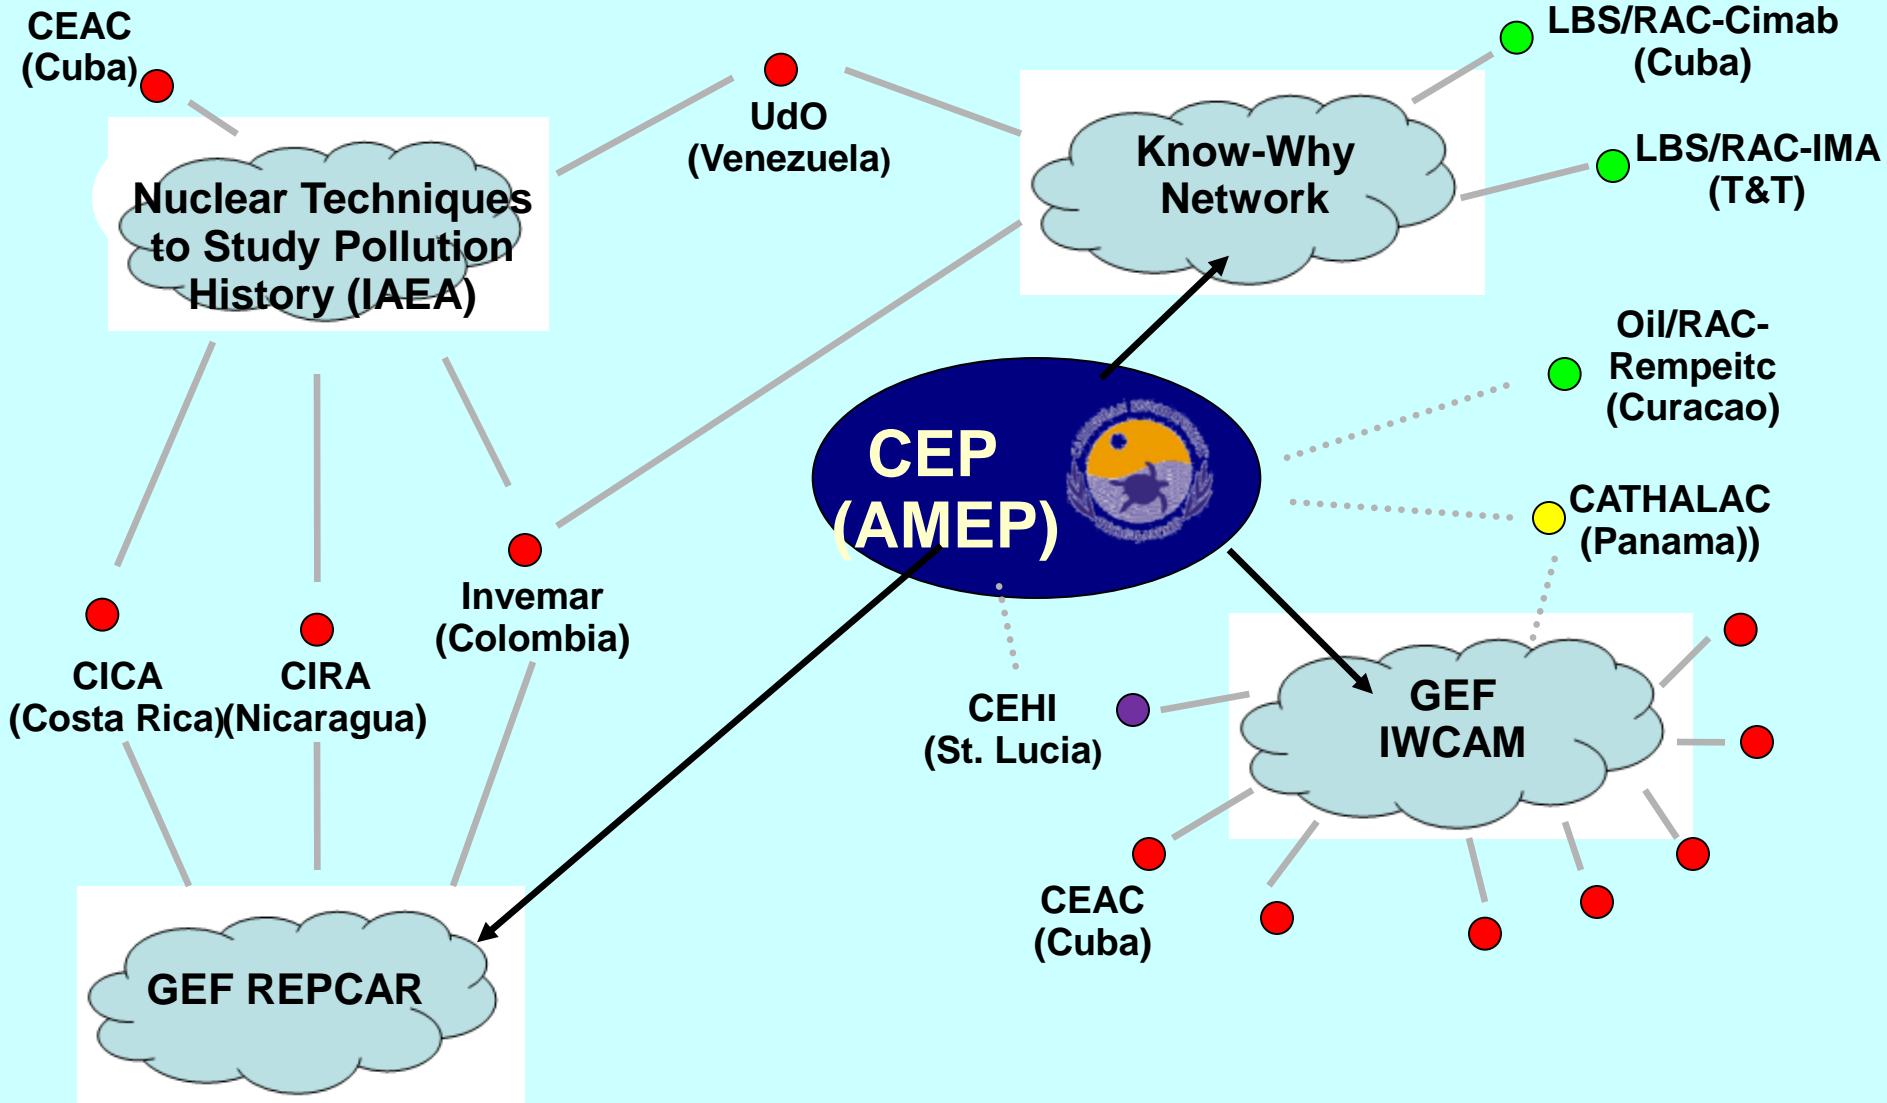

Links to State of Convention Area Report

## PROJECTS WITH A COASTAL AND/OR WATERSHED MONITORING COMPONENT

# Regional Activity Network (RAN)

# Threat from Coastal Development

in the Wider Caribbean Region

Project "Broad-scale marine spatial planning of mammal corridors & protected areas in Wider Caribbean & Southeast & Northeast Pacific" (2010-2012)

# Wider Caribbean Region

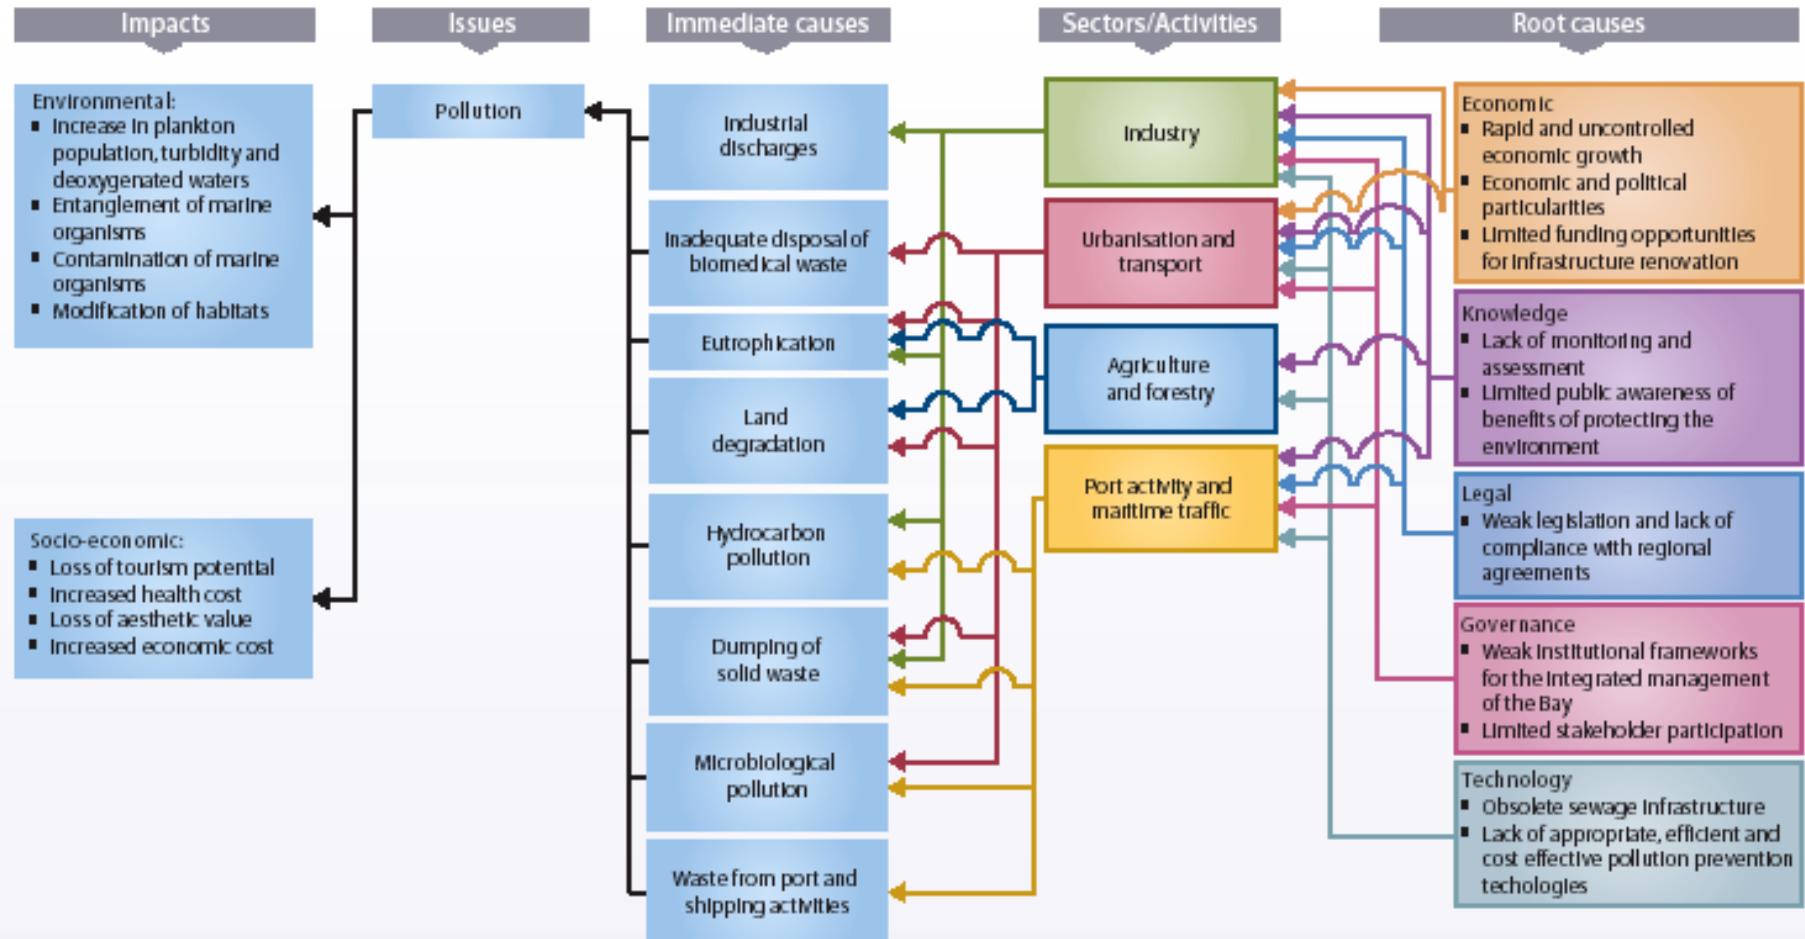

**Assessment Results, Lessons learned  
& Recommendations**

**Antonio Villasol  
Director RAC-CIMAB**

# Wide Caribbean Region states & territories

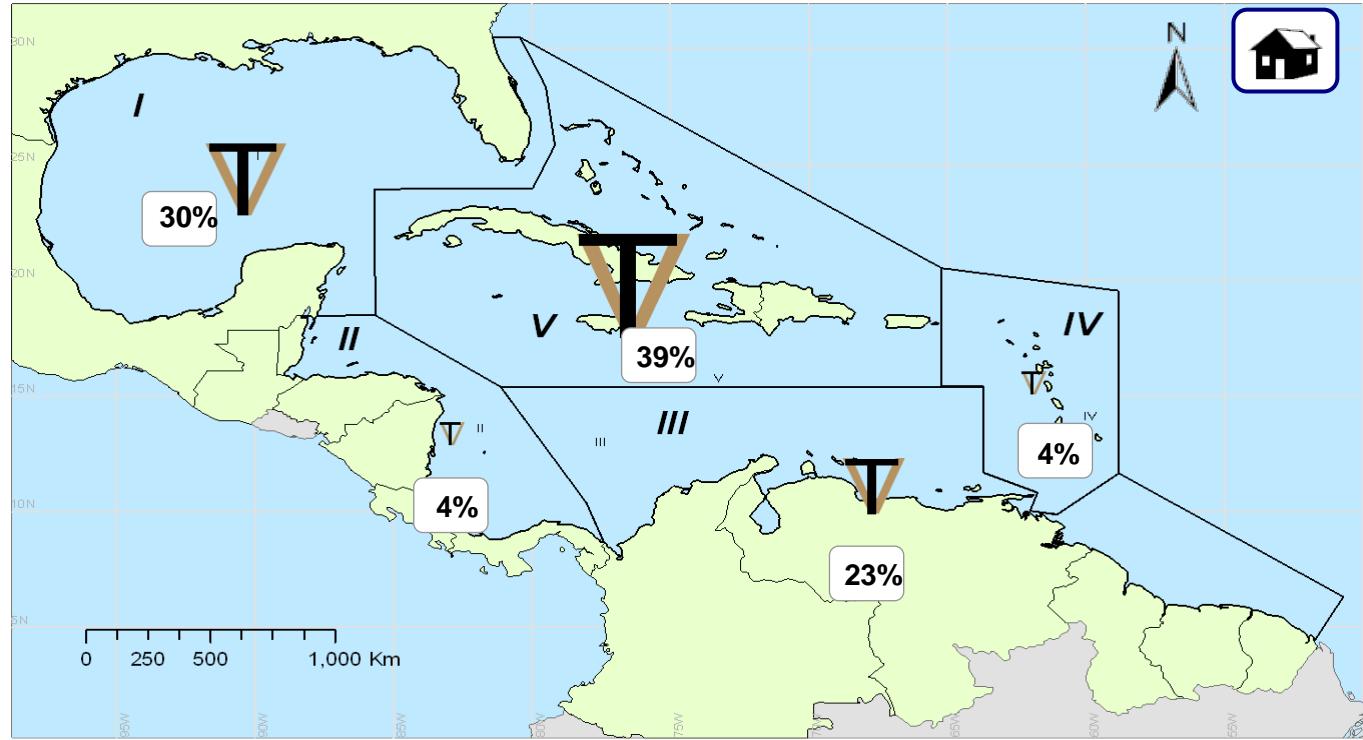

# GIWA Subregion

# Technical Report # 52

## Some results

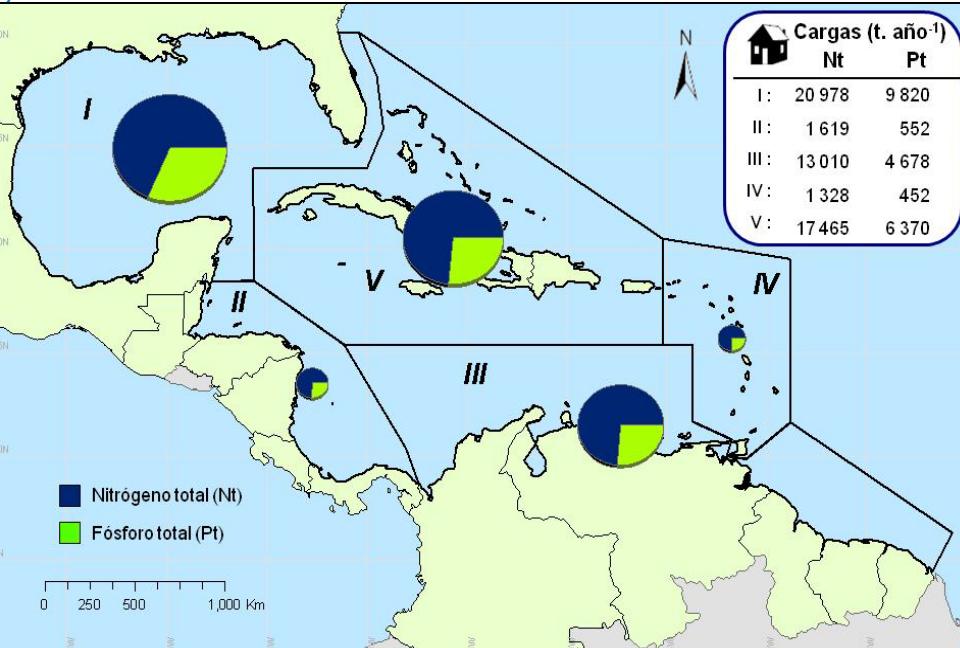

Percentage of domestic wastewaters flow discharged by sub-region in WCR

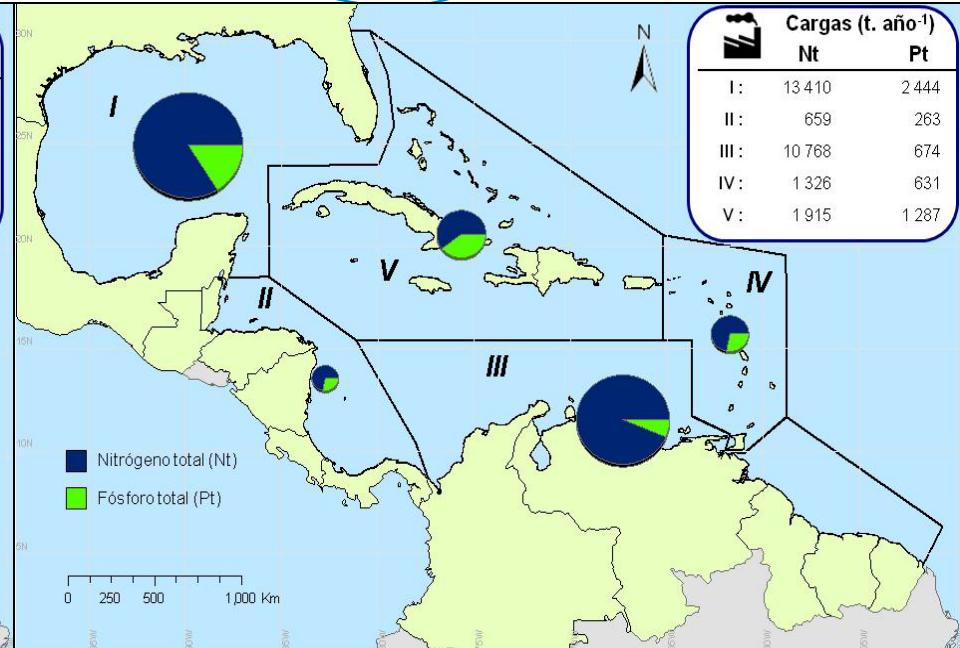

# Technical Report # 52

## Some results.

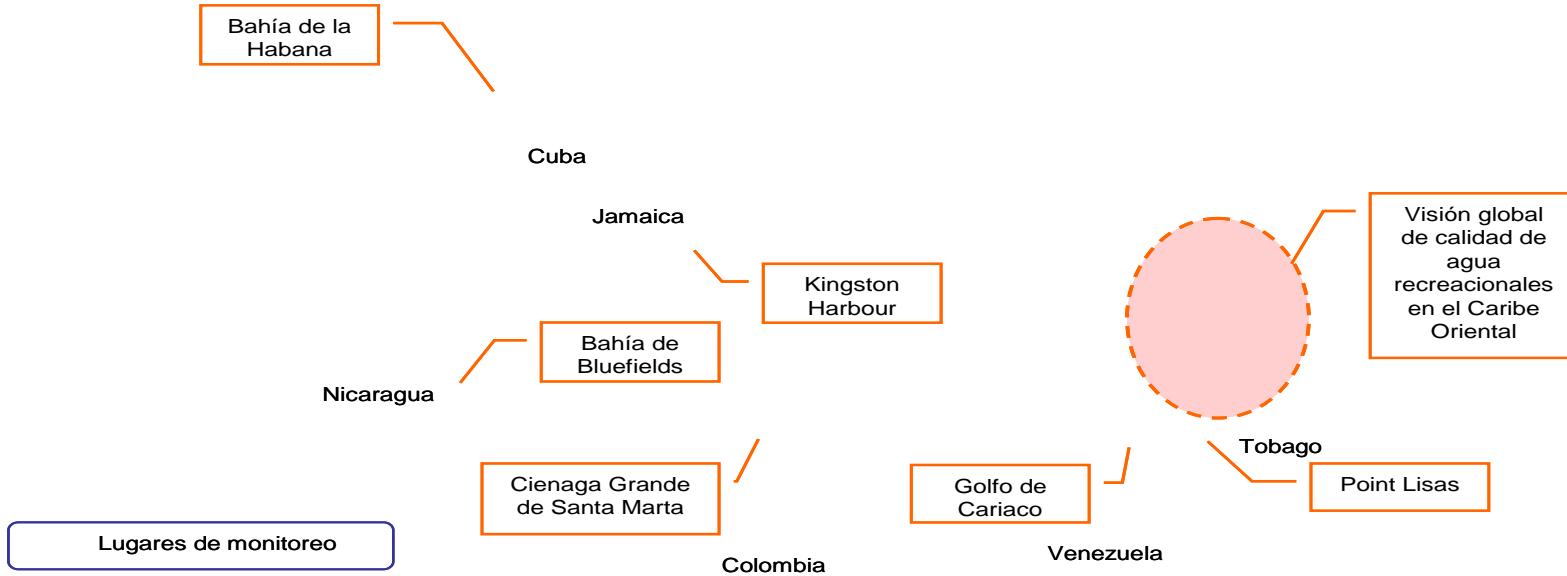

Nutrients inflow (TN and TP) of domestic origin by sub-region in WCR ( $t.yr^{-1}$ ).

Nutrients (TN and TP) inflow of industrial origin by sub-region in WCR ( $t.yr^{-1}$ )

# Programa de Monitoreo de la Calidad de Ecosistemas Marinos en Zonas de alto Riesgo en la RGC. (KWN)

# Principales Resultados Proyecto KWN

## Causas:

**Aporte de aguas servidas a zonas costeras.**

**Vertimiento de residuales industriales, sin tratamiento o con tratamientos deficientes.**

**Residuos sólidos flotantes que llegan a la zona costera.**

**Los residuales producidos por la actividad marítimo - portuaria.**

## Consecuencias:

**Alta concentración de materia orgánica y nutrientes (compuestos del fósforo y del nitrógeno), que generan procesos de eutrofización.**

**Concentraciones elevadas de tóxicos orgánicos e inorgánicos (hidrocarburos del petróleo y metales pesados).**

**Concentraciones de microorganismos de origen fecal por encima de los criterios nacionales e internacionales de calidad que afectan las zonas costeras de uso recreacional.**

# LÍNEA BASE SOBRE EL MANEJO DE LAS AGUAS RESIDUALES DOMESTICAS

## Resultados:

**Insuficientes políticas y leyes para el sector de saneamiento.**

**Insuficiente comprensión de las alternativas de tratamiento y limitadas capacidades técnicas para su gestión.**

**Predominio de tanques sépticos, seguido de letrinas y el alcantarillado sanitario convencional.**

**Cobertura de Saneamiento sobrepasa el 50% de la población costera mientras.**

**Los efluentes de alcantarillado con algún grado de tratamiento se encuentran por debajo del 50%.**

**Las políticas y leyes son suficientes, el problema es que no se aplican y no se controlan como es debido.**

**Existen problemas por falta de instituciones con organización y financiamiento.**

# NECESIDADES DE LA REGION

- **Capacitación** Para desarrollar el capital humano.
- **Cooperación** Para desarrollar proyectos conjuntos e intercambiar resultados y experiencias entre las instituciones de la región.
- **Financiamiento** Para ejecutar soluciones ambientales complejas, proyectos de monitoreo en la región y mejorar la capacidad institucional.
- **Voluntad Política** Para apoyar el desarrollo del Programa Ambiental del Caribe y sus Protocolos.
